**SUPPLEMENT  
REPORT NO.**

THIS IS UNEVALUATED INFORMATION

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

1. During the period from 23 January through 9 February 1952, type RDS mobile  
X1 (centimeter radio stations built at the Sachsenwerk plant in Zeitz (N 52/F 39)  
X1 were taken over by a Soviet commission headed by Lieutenant Colonel Moldavanov  
(fnu), who arrived from Potsdam-Babelsberg in sedan /1-44-00. (1) The  
inspecting staff, which wore red-bordered black epaulettes with golden radio  
operator insignia, was detached from a Soviet army signal communications unit  
in Luckenwalde (N 53/Z 70) and included 4 officers, about 10 sergeants, 10  
corporals or privates and 10 drivers. The officers and sergeants wore war  
decorations and appeared to be familiar with the RDS type radio stations. The  
corporals or privates were 20 to 22 years old, and some of them had been in  
Germany only for three to four months.

2. Scheduled to be accepted were eight RDS 1B type radio trucks [redacted] and four RDS 2 and RDS 3 type radio trucks each. The latter trucks were turned in for repair in August and were originally scheduled to be taken over in October 1951. Because of technical deficiencies found by the Russians, the eight RDS 1B type radio trucks were not accepted. The acceptance of the RDS 2 and 3 type radio stations was again postponed because there was not sufficient time to test them. (3) The acceptance tests were carried out involving the use of three mobile antenna masts of the signal communication unit. On 12 or 13 February, these masts were taken to the Vetschau (H 52/A 37) plant of the WBW Iowa for repair. (4)
3. In a conversation pertaining to the 10 RDS 1A type radio trucks taken over in February 1951, Lieutenant Colonel Moldavanov mentioned that Senior Lieutenant Galtsov (Inu) had to transfer his RDS type radio trucks to the U.S.S.R. by road, since their dimensions exceeded the clearances of Polish railroad bridges.

25X1

Comments.

- (1) Information on the equipment of the radio trucks manufactured in Sadeberg was transmitted previously. [redacted] The RDS type radio trucks carry the radio transmitter and receiver, while the carrier frequency and radio telegraphy equipment is mounted on the RDS 2 and 3 radio trucks.
- (2) According to available information, Lieutenant Colonel [redacted] Moldavanov (Inu) is the procurement officer of an unidentified army unit [redacted]
